

Amendments to the Abstract:

~~A~~ An improved nozzle assembly ~~of for a dishwasher is provided.~~ ~~enables injection holes~~
~~of a top nozzle to selectively face a top or bottom rack to spray water toward the bottom rack~~
~~when items to be washed are loaded on the bottom rack only.~~ The nozzle assembly includes a
first and second nozzles[,], rotatably installed adjacent to corresponding first and second racks;
~~respectively, for so as to selectively spraying-spray~~ water in first and second directions. ~~The first~~
~~nozzle~~ One of the nozzles includes a device for manually setting the spraying direction. ~~The first~~
~~nozzle also includes, including~~ a fixed central piece, ~~communicating with a water circulator,~~
~~having two open ends;~~ and first and second nozzle sections, ~~communicating with.~~ The the fixed
central piece is in communication with a water circulator, and supplies water to the first and
second nozzle sections. ~~and each having a closed end and an open end, the closed end of~~ An
open end of each nozzle section ~~being~~ is rotatably coupled to ~~one~~ an open end of the fixed
central piece[.], ~~and the~~ The first and second nozzle sections ~~are~~ may be rotated using ~~the~~ a
manual setting device so as to direct a spray of water in different directions.
